-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.

The Examiner needs a complete copy of the Korean reference cited on the PTO-1449 form in this application. Currently, the Examiner only has the English-language Abstract of the document.

It is also noted for the record that an application corresponding to the current one has been filed in Japan (as Application JP 2003-326030) corresponding to published Japanese application JP 2004-308401 (cited with this office action). Ant prior art from any foreign patent office pertaining to any application corresponding to the current one is required now or as soon as possible after it is received.

This application contains claims directed to the following patentably distinct species of the claimed invention:

first species of guide plates (not illustrated in a drawing Figure) wherein the guide plates are integrally formed on the lower side of the upper plate as disclosed on page 9, lines 9-20 of the specification (and claimed in claim 3) and

second species of guide plates (as illustrated in Figure 3) wherein the guide plates engage into recesses in the lower side of the upper plate (and claimed in claim 4).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 appears to be generic (and claim 3 appears to be improperly dependent from sub-generic and/or mis-descriptive claim 2, in so far as claim 2 states that the "recess parts" (17) are where the "support legs" 13 are

Art Unit: 3753

located, when, in fact, the "recessed parts" (17) are where the guide plates (15a, 15b) are located).

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication should be directed to John K. Ford at telephone number 571-272-4911.
